## STAYTIGHT DEER FENCE

- Hurricane 13-190-30 and 13-190-15 Staytight Deer and Fawn Fence takes all the existing features and benefits of the traditional deer fence product and adds more value for the farmer.
- 2 Specifications for enhanced stock control
  - Proven quality 2.5 HT line wires
  - Proven quality Staytight knot
  - Tested to meet NZ Standards
  - Accepted 13 line formula

Hurricane Deer and Fawn Fence has been designed and trialed in conjunction with deer farmers and fencing contractors to give better protection to fawns while still providing a solid stock proof fence for the older animals.

For those farmers wanting to fawn proof existing fences, use Hurricane Fawn Fence.

This 5 line fence overlays your existing fence and is positioned between the existing fence line wires to close up the gaps that allow the fawns to escape. Order code FFHS 56030HL200

Existing fences can be converted to Deer netting by using Hurricane 5 Line top up fencing to increase height to meet specifications. Order code FFS59030E

## HINGE-JOINT GAME FENCE

Hinge Joint is the original Hurricane Fabricated Fence designed to make fencing easy, and like all Hurricane Wire Products it's "Built To Last".

With this specification of Hinge Joint the spacings of the line wires at the bottom of the fence are closer together for added protection against stock escaping.

The flexible "Hinge Joint Knot" allows for stock pressure with minimal damage to the wire.
